

w03-p1: Show first card and chang icon color using DevTools

Thu Sep 19 19:29:18 2024 +0800 w03-p1: collaborate your Github repo to htchung@gms.tku.edu.tw :

W03-P2: Show btn and btn-1 class selector in DevTools compare to that in HTML and CSS

The image displays a development environment with VS Code on the left and a web browser on the right. The VS Code editor shows three files: `index.html`, `style_36.css`, and `notes.txt`. The `index.html` file contains the following HTML structure:

```
<html>
<body>
  <div class="card card-1">
    <div class="icon"></div>
    <h2>First Card</h2>
    <p>Lorem ipsum dolor sit amet consectetur adipisicing elit. Nulla, quidem, saepe repellat vel eius illum consectetur</p>
    <button class="btn btn-1">sign in</button>
  </div>
  <div class="card card-2">
    <div class="icon"></div>
    <h2>Seconde Card</h2>
    <p>Lorem ipsum dolor sit amet consectetur adipisicing elit. Nulla, quidem, saepe repellat vel eius illum consectetur</p>
    <button class="btn btn-2">sign up</button>
  </div>
</body>
</html>
```

The `style_36.css` file contains the following CSS rules:

```
.card-1{
  width: 300px;
  height: 200px;
  border: 1px solid #ccc;
  border-radius: 10px;
  padding: 10px;
  background-color: #fff;
}

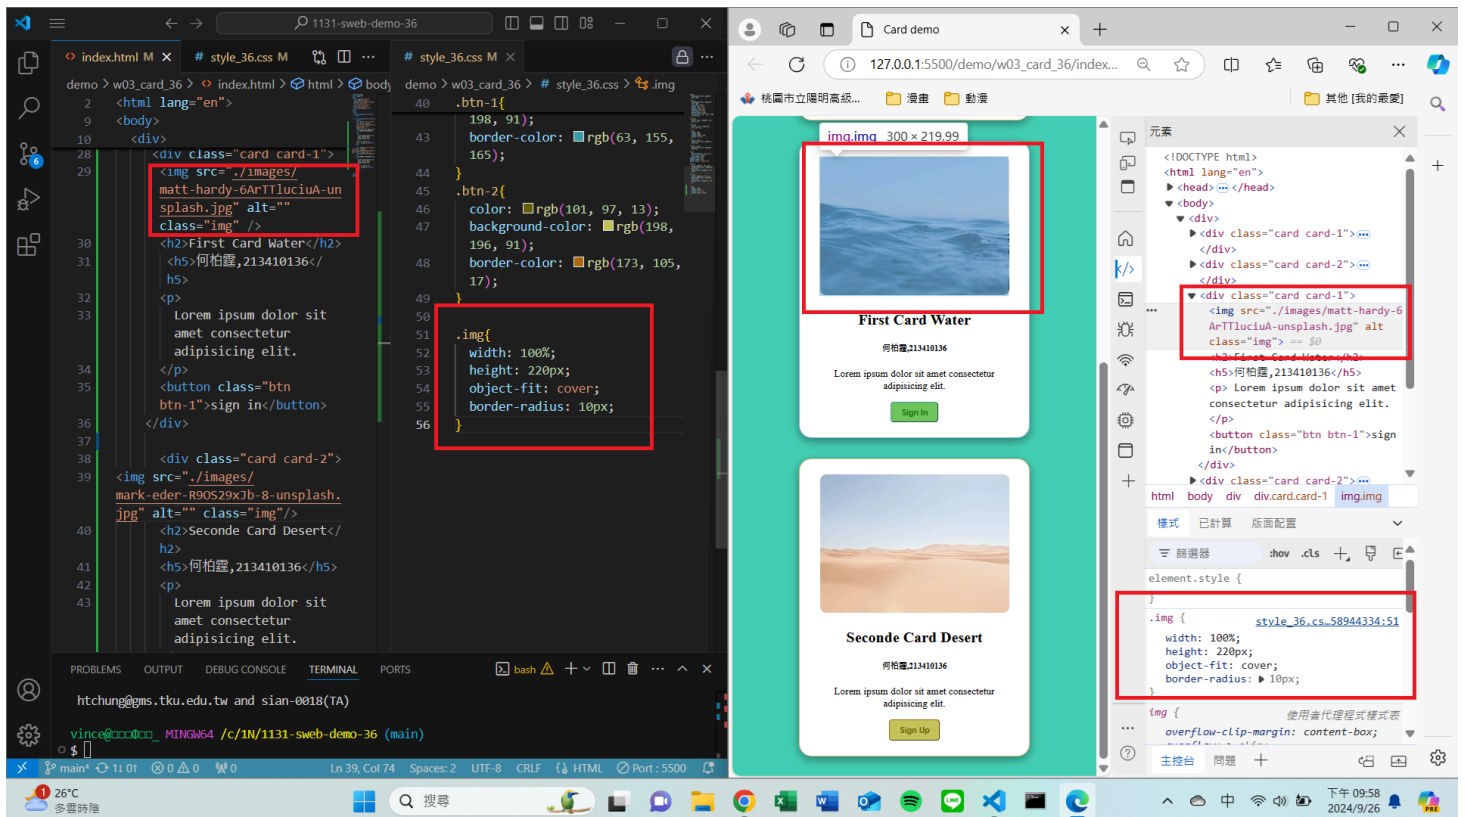

.btn{
  text-transform: capitalize;
  font-size: 0.8rem;
  font-weight: 600;
  padding: 8px 15px;
  border-radius: 5px;
  border-color: transparent;
}

.btn-1{
  color: #171910;
  background-color: #114198;
  border-color: #631515;
}

.btn-2{
  color: #101317;
  background-color: #131741;
  border-color: #151663;
}
```

The browser window shows the rendered "Card demo" with two cards. The "First Card" has a green "Sign In" button, and the "Seconde Card" has a yellow "Sign Up" button. The Chrome DevTools "Elements" panel shows the DOM tree with the `button` elements highlighted. The "Styles" panel shows the CSS rules for `btn-1` and `btn` applied to the selected button.

W03-P3: Show 2 photos with the same height, remain photo ration, and show .img class selector
